Web-Based
Case Management
and Intelligence Software

HIDTA

Case Management

Manages case information about people, places, things, vehicles, weapons and drugs.

➤ Each case can have an unlimited number of file attachments such as documents, pictures, audio and video files.

➤ Web interface eases the management of case data.

➤ Optional interface into HIDTA Performance Management Program (PMP).

Criminal Intelligence

Easily collect, analyze and disseminate intelligence within and among organizations.

➤ 28CFR Part 23 compliant.

Tips Management

➤ Confidentially stores but does not share unconfirmed data.

Case Deconfliction

Match data between organizations allowing interagency deconfliction while maintaining control of local data.

➤ Email notifications are sent for case matches.

CASE EXPLORER software is free to all law enforcement and public safety organizations. Support services are also available.
www.hidta.org/ce

Event Deconfliction

Plot events geospatially with notification of any conflicting events within your defined radius.

➤ Email notifications are sent for event conflicts.

➤ Spatial awareness feature allows addresses associated with any case or event to be mapped.
